EDUCATION

Michigan State University
B.S Computer Science – GPA 3.8

East Lansing, MI
Graduated May 2026

TECHNICAL SKILLS

Languages: Java, TypeScript, Python, PHP, MySQL, PostgreSQL, HTML, CSS, JavaScript, C++

Frameworks & Libraries: Angular, React, React Native, Node.js, Express.js, Spring Boot, JUnit, Mockito, Flask, Drupal, FastAPI, Django, TensorFlow, Scikit-learn, NumPy, Pandas, JEST

Tools & Technologies: AWS, Azure, Firebase, MongoDB, Git, GitHub, Argo CD, Dynatrace, Docker, Linux, Android Studio, Figma, Jupyter, Google Colab

EXPERIENCE

Application Developer intern Nov 2024 – May 2026
Delta Dental of Michigan Okemos, MI

- **Improved audit capabilities** for dental insurance contracts impacting **22M+** users by implementing **Spring Boot APIs** with **complex SQL queries** and comprehensive unit and integration tests using **JUnit and Mockito**.
- **Reduced manual eligibility review time** for **100+ analysts** by building an end-to-end **AI automation pipeline** that pulls **enrollment documents** from Outlook, routes them through Roosevelt Solutions, and processes them asynchronously using **Azure OpenAI and Document Intelligence agents** via FastAPI.
- **Accelerated** analyst enrollment completion by **designing and developing an Angular UI** within Roosevelt Solutions that surfaces **structured AI agent outputs for human review**, enabling analysts to validate and complete enrollment decisions without leaving the platform.

Student Web Developer Jan 2023 – May 2025
Michigan State University East Lansing, MI

- **Refactored** the MSU Sports Camps site **to use Drupal** to **improve stability and experience for 2000+ users**, maintaining a platform generating **over \$1M annually in program revenue**.
- **Eliminated manual** event feed **maintenance** for **10+ MSU venues** by **building a reusable PHP Drupal Hooks module** that auto-generates customized XML feeds per venue.

PROJECTS

Developable | *Python, Jinja2, Express.js, Prisma, Typescript, Pytest, Docker, Anthropic Claude*

- **Reduced** full backend generation **cost to under \$0.10** per schema run by **architecting an AI-native multi-agent pipeline** that produces production-ready Express + TypeScript APIs with ownership-enforced authorization and Zod validation.
- **Cut redundant LLM calls** by 20%+ on schema re-runs by **implementing Anthropic prompt caching** and a disk-backed response cache with structured per-task cost tracking across all generation sessions.
- **Achieved 100+ integration tests per generated schema** by designing isolated Developer, Tester, and Version Control agents each owning a distinct generation concern across the full output lifecycle.

ContractOS | *Next.js, TypeScript, PostgreSQL, Prisma, Next.js API Routes*

- **Eliminated** staffing vendor **dependence** for 10+ hiring stages by **building a declarative workflow engine with configurable templates** covering the full contractor lifecycle from requisition to offboarding.
- **Maintained full auditability** for organizations **managing 50+ concurrent assignments** by **building an append-only EventLog** with deadline triggers and document checkpoints at each compliance gate.
